EDUCATION

SYSTEMS ENGINEERING

Institution: UTN FRRO
2020-Present

FRONTEND REACTJS DEVELOPER

Institution: CODERHOUSE
2022

BACKEND NODEJS DEVELOPER

Institution: CODERHOUSE
2023-Present

ELECTRO MECHANICAL TECHNICIAN

Institution: EETP N°280
2014-2019

BACKEND

- NodeJs (learning)
- Express (learning)
- MongoDB (learning)

OTHER

- Firebase
- Python (basics)
- C (basics)
- Pascal (basics)

PERSONAL PROJECTS

E-COMMERCE | ReactJs

- e-commerce built with HTML5, CSS3, Bootstrap, SASS, JavaScript, ReactJs.
- Products and orders processed are stored in Firebase Database.
- The project is hosted on GitHub.

STARBUCKS CLONE | ReactJs

- Replicated Starbucks website design and functionalities.
- Build with HTML5, CSS3, Bootstrap, SASS, JavaScript, ReactJs to create components and React Router to set up links and routes.
- Repository available on GitHub.

WHERE TO WATCH | ReactJs (Under construction)

- Design and development of a website where you can get information about any movie or series and also know which streaming services it is available on depending on your country.
- This project uses TMDB API to collect data from a wide range of movies and series.
- Developed with ReactJs, SASS, Bootstrap, React Router.

E-COMMERCE | JavaScript

- Design and development of an e-commerce of hardware.
- Technologies such as HTML5, CSS3 and Bootstrap were used for markup and styles, JavaScript for functionalities such as filters, searchbar and cart. Later hosted on GitHub.
