Institution: EETP N°280  
2014-2019

## PERSONAL PROJECTS

### WHERE TO WATCH | ReactJS

- Development of a website where you can get information about any movie and also know which streaming services it is available on depending on your country.
- This project uses TMDB API to collect data from a wide range of movies.
- Developed with ReactJS, SASS, Bootstrap.

### STARBUCKS CLONE | ReactJS

- Replicated Starbucks website design and functionalities.
- Build with HTML5, CSS3, Bootstrap, SASS, JavaScript, ReactJS to create components and React Router to set up links and routes.
- Repository available on GitHub.

### TRANSLATOR | NextJs (Under construction)

- Web application to translate a text from one language to another.
- Build with NextJs, ReactJs and SASS.
- Repository available on GitHub.

### E-COMMERCE | ReactJS

- e-commerce built with HTML5, CSS3, Bootstrap, SASS, JavaScript, ReactJS.
- Products and orders processed are stored in Firebase Database.
- The project is hosted on GitHub.
