EXPERIENCE

Fullstack Developer at Artfos

May 2023 - Present [Rosario, Argentina]

- Developed high-performance reusable components using Vue and TypeScript, adhering strictly to the provided design specifications and focusing on optimal user experience.
- Played a key role in transforming the frontend codebase by leveraging reusable components employing design patterns.
- Optimized validation processes for large CSV files by integrating Redis, significantly reducing data processing times.
- Enhanced API endpoints and database queries, resulting in a 30% reduction in load times.
- Collaborated with stakeholders to analyze project feasibility, identify critical user needs and define essential project requirements.
- Successfully migrated Yii API to Laravel, ensuring a smooth transition and minimal disruption to existing workflows.

EDUCATION

Systems Engineering | Universidad Tecnológica Nacional

Mar 2020 - Present [Rosario, Argentina]
